(54) DEVICE AND METHOD FOR MANAGING NETWORK

(57)Abstract:

PROBLEM TO BE SOLVED: To efficiently generate a physical map without the burden on a manager by generating installation place information from an indication position on a background diagram and setting it in an installation place information storage area.

SOLUTION: In a device to be managed, the pertinent background drawing is designated from a background drawing list, ID of the background is sent to the management device 1A and the management device 1A decides the background drawing to be transferred and sends it to the device to be managed. The device to be managed displays the background drawing 11a which is sent on a display device, and an indication device designates the self installation place on the background drawing displayed on the display device. The coordinate of the installation place on the background drawing is decided from the position designated by the indication device, and it is preserved in the installation place information storage area. The installation place is preserved and the management device 1A generates the physical map from the background drawing 11a and installation place information of the device to be managed and displays it on the display device 17.
